### DETAILED ACTION

This action responds to the Election filed 19 November 2004. In the restriction, Examiner inadvertently indicated that claims 43-45 were drawn to a method of fabricating a transistor. However, claims 46-48 are clearly drawn to a method of fabricating a transistor, while claims 43-45 should have been grouped with Group I, drawn to a method of fabricating a semiconductor structure. Accordingly, the restriction requirement is being made anew, for clarity of record. Examiner apologizes for any inconvenience.

#### *Election/Restrictions*

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:
  - I. Claims 36-45 and 49-55, drawn to a method of fabricating a semiconductor structure, classified in class 438, subclass 786.
  - II. Claims 46-48, drawn to a method of fabricating a transistor, classified in class 438, subclass 287.

The inventions are distinct, each from the other because of the following reasons:

2. Inventions I and II are related as subcombinations disclosed as usable together in a single combination. The subcombinations are distinct from each other if they are shown to be separately usable. In the instant case, invention I has separate utility such as an interconnect layer or a bit node contact. Note also that the instant specification states on p. 1, lines 11 and 12, "There are **numerous applications** in semiconductor processing which it is desired to form conductive layers over oxides." (Emphasis added.) See MPEP § 806.05(d).

Art Unit: 2813

3. Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper.
4. Because these inventions are distinct for the reasons given above and the search required for Group I is not required for Group II, restriction for examination purposes as indicated is proper.
5. Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).
6. Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).
7. It is further noted that the instant specification includes several embodiments not presently claimed, but pending in related applications. Should Applicant introduce additional embodiments, be they inventions or species, the claims will be subject to further restriction by original presentation.
